PART I

Introduction

Jellin is a loyalty and rewards platform that connects businesses with their customers through the simplest possible interaction: a phone number, an email, or a QR scan. No app download required, no plastic cards, no lengthy registration — just instant, tangible rewards that make everyday transactions more meaningful.

What Jellin Does

Jellin gives any business — from a single café to a hotel network to an entire shopping mall — the ability to run professional loyalty programs, instant promotions, and cross-business reward ecosystems. Customers participate by sharing only a phone number or email. Rewards are delivered via SMS, email, or the optional Jellin app.

For customers, loyalty becomes effortless. For businesses, repeat visits become measurable.

The Problem Jellin Solves

Most loyalty programs fail because they demand too much from customers and deliver too little in return. They require app downloads, lengthy forms, plastic cards, or passwords. Customers lose interest before ever reaching a reward. Businesses invest in programs they can't measure.

On the business side, independent shops lack the tools that large chains take for granted. Multi-location operators struggle with siloed customer data. Hotels and malls have no practical way to connect partner businesses into a shared loyalty experience.

Jellin eliminates these barriers on both sides.

Five Strong Points

1. Zero-Barrier Participation

A phone number or email is all it takes. There is no app to download, no account to create, no card to carry. A customer can be enrolled in seconds — at a café counter, a hotel reception desk, or a mall checkout.

This matters because the biggest obstacle to loyalty program success is sign-up friction. Every additional step loses customers. Jellin reduces the enrollment to a single question: *"Your number?"*

Technical foundation: Jellin supports two check-in methods — QR scan (for app users) and phone number / email lookup (for everyone else). Both methods lead to the same reward experience.

2. Rewards That Feel Immediate

Jellin doesn't make people wait months to see value. A free coffee on the 5th visit. A match ticket with a jacket purchase. A discount the moment you check into a hotel. The payoff is fast and tangible.

The platform supports three distinct coupon types:

- **Counting coupons** — earned after a set number of check-ins (e.g., "free coffee every 5 visits")
- **Instant coupons** — assigned on the spot by staff. Perfect for welcome offers and partner promotions.
- **Sweepstake coupons** — awarded randomly to enrolled customers within a date range.

3. One Identity, Many Places

Jells earned at one business carry over to partner businesses. A single phone number connects a customer to an entire neighborhood, mall, or brand network — without juggling separate loyalty cards or apps.

This cross-business capability works through a group-based architecture:

- **Internal groups** — for own locations, where employees can assign both Jells and instant coupons.
- **Partner groups** — for satellite businesses, where invited external operators can assign instant coupons under the host's loyalty program.

4. Privacy Without Compromise

Customers share only a phone number or email. There is no personal data harvesting, no invasive tracking, no behavioral profiling beyond what the customer explicitly opts into. Jellin is GDPR-compliant by design.

This is a competitive advantage, not just a compliance checkbox. In a market where consumers are increasingly wary of data collection, Jellin's minimal-data approach builds trust.

5. Works on Every Channel

Whether someone prefers SMS, email, a QR scan, or the full app experience, Jellin meets them where they are:

- **Email** — with an embedded QR code that can be shown at any point of sale
- **SMS** — with a QR link for instant access
- **App** — for customers who prefer the in-app experience

Who Uses Jellin

Customers

Persona	Context	How Jellin Helps
The Daily Regular	Coffee shop, bakery, local store	Automatic rewards for repeat visits — no cards, no apps, just a phone number
The Fitness Enthusiast	Multi-location gym chain	Jells accumulate across all locations via QR check-in; unlock free sessions and merchandise
The Hotel Traveler	Hotel in an unfamiliar city	Welcome SMS with instant discounts at the hotel and partner businesses nearby
The Sports Fan	Team merchandise purchase	Buy a jacket, receive a free match ticket via email with QR entry
The Mall Explorer	Shopping mall	Earn Jells at any store; redeem a mall-wide gift card after reaching the threshold

Businesses

Persona	Context	How Jellin Helps
The Independent Shop Owner	Single-location café, boutique	Set up campaigns in minutes; see real-time analytics on what drives repeat business
The Multi-Location Operator	Gym chain, restaurant group	Unified dashboard across all locations; cross-location loyalty, employee tracking
The Ecosystem Builder	Hotel, mall, business district	White-label loyalty umbrella connecting partner businesses; shared foot traffic
The Marketing Professional	Agency managing client campaigns	One platform for loyalty, coupons, and engagement; provable ROI
The Sports / Entertainment Org	Team, venue, event promoter	Connect merchandise sales to experiences; turn casual buyers into devoted fans

How It Works — In 30 Seconds

For the Customer

1. Visit a participating business
2. Share your phone number or scan a QR code
3. Earn Jells or receive an instant coupon
4. Redeem rewards at the same business or any partner in the network

For the Business

1. Create a Jellin account and set up loyalty programs
2. Define coupon rules (counting thresholds, instant offers, sweepstakes)
3. Organize locations and partners into groups
4. Staff check in customers and assign rewards
5. Monitor everything through real-time analytics

Platform at a Glance

Capability	Detail
Coupon types	Counting (earn after X visits), Instant (on-the-spot), Sweepstake (random within date range)
Check-in methods	QR scan (app) or phone number / email (no app)
User roles	Owner (full control), Manager (operations + analytics), Employee (check-in + rewards only)
Groups	Organize by location, partner network, or campaign — unlimited groups on Enterprise
Cross-business	Invite partner businesses as operators; customers earn and redeem across the network
Delivery	Email (QR), SMS (QR link), App (in-app QR)
Analytics	By program, group, location, employee, coupon type, customer, time period
Privacy	Phone number or email only — GDPR-compliant, no invasive tracking

Why Jellin Is Different

Traditional loyalty platforms force a choice: simple but limited, or powerful but complex. Jellin offers both simplicity and depth:

- A café owner can set up a "free coffee every 5 visits" campaign in minutes — and that's all they need.
- A hotel chain can build a cross-business ecosystem with partner cafés, boutiques, and tour operators — all managed from one dashboard.
- Both use the same platform. The complexity is there when needed, invisible when it's not.

The combination of **zero-friction participation**, **cross-business collaboration**, and **multi-channel delivery** means Jellin works for the widest possible range of businesses and customers — without requiring either side to change how they already operate.

PART II

User Personas

The key personas that interact with the Jellin platform — from everyday customers to business operators and frontline staff.

How Jellin Benefits Everyday Life

The Daily Regular — "Sarah"

COFFEE SHOP SCENARIO

Before Jellin:

Sarah visits her coffee shop every morning but has nothing to show for her loyalty. Maybe there's a paper punch card she keeps losing, or a clunky app she never downloaded.

Everyday impact: Loyalty becomes effortless. Her morning habit is rewarded without changing anything about how she already lives.

With Jellin:

Sarah gives her phone number once. Every visit is automatically tracked. On her 5th visit she gets her coffee free. She never has to remember a card, open an app, or ask for a stamp.

The Fitness Enthusiast

GYM NETWORK SCENARIO

Before Jellin:

A gym member who trains at multiple locations has no way to consolidate progress. Each branch feels like starting over.

Everyday impact: Consistency across the network is rewarded, making it easier to stick to fitness goals.

With Jellin:

Every check-in at any location earns Jells. A quick QR scan at the front desk and the points stack up. At 10 Jells, a free personal training session unlocks.

The Hotel Traveler

HOTEL / HOSPITALITY ECOSYSTEM

Before Jellin:

A traveler checks into a hotel in an unfamiliar city. They don't know where to eat or what to explore. Paper flyers end up in the bin.

Everyday impact: Travel feels more connected and rewarding. The guest discovers genuinely good local spots — all because one phone number unlocked an entire ecosystem.

With Jellin:

The concierge Jells their phone number at check-in. Instantly, the guest gets a welcome SMS with 5 Jells: 20% off breakfast, a free coffee, and partner discounts nearby.

The Sports Fan

SPORTS TEAM / MERCHANDISE

Before Jellin:

A fan buys a team jacket online. The purchase and the match-day experience exist in separate worlds.

With Jellin:

The fan enters their email at checkout. Instantly, they receive a free ticket for Sunday's match — delivered as a QR code via email.

Everyday impact: Merchandise purchases are no longer just transactions — they're keys to experiences.

The Mall Explorer

SHOPPING MALL

Before Jellin:

A casual shopper visits a mall. Each store has its own loyalty program (or none at all). Spending is scattered and unrewarded.

With Jellin:

The cashier asks "Your number?" — and with that, the shopper earns Jells at the clothing store, bookstore, food court, and electronics shop. At 20 Jells: a \$20 mall gift card.

Everyday impact: Shopping becomes an interconnected experience. Exploring new stores feels rewarding rather than aimless.

The Independent Shop Owner

BUSINESS OPERATOR

Before Jellin:

A cafe owner knows regulars by face but has no system to reward them. Marketing means an Instagram post and hoping for the best.

With Jellin:

In minutes, the owner sets up a "free coffee every 5 visits" campaign. The dashboard shows who's coming back, how often, and which campaigns work.

Everyday impact: Running a small business becomes less stressful — a clear, affordable tool to build repeat customers and prove what's working.

The Multi-Location Operator

BUSINESS OPERATOR

Before Jellin:

A gym chain manages each location's loyalty separately. Customer data is siloed. Employee performance is hard to track.

With Jellin:

One unified dashboard covers all locations. The operator sees segmented metrics by salepoint, monitors employees, and scales from 3 to 30 locations without rebuilding.

Everyday impact: Growth stops feeling chaotic. Strategic decisions are backed by real data.

The Ecosystem Builder

BUSINESS OPERATOR

Before Jellin:

A hotel manager tries to create partnership value between tenant businesses. Coordination is manual — no shared system, no tracking.

With Jellin:

A white-label loyalty umbrella. A hotel guest earns Jells that work at the partner cafe and boutique. Partners get shared foot traffic without complex setup.

Everyday impact: An entire business neighborhood comes alive as a connected experience.

The Marketing Professional

AGENCY / CONSULTANT

Before Jellin:

A marketing agency runs campaigns but struggles to prove direct impact on foot traffic, repeat visits, and conversions.

With Jellin:

Real-time analytics show exactly how many people redeemed, how often they return, and which campaigns perform best. Hard numbers, not just impressions.

Everyday impact: Client relationships improve because results are provable. The agency becomes a growth partner.

The Sports / Entertainment Organization

BUSINESS OPERATOR

Before Jellin:

A sports team sells merchandise and game tickets through separate channels with no connection between them.

With Jellin:

Merchandise purchases trigger experience rewards. Buy a jacket, get a free match ticket. Online + stadium entry connected through one system.

Everyday impact: Fan engagement deepens. Revenue streams reinforce each other instead of competing.

The Cashier / Receptionist

FRONTLINE STAFF

Before Jellin:

Frontline staff deal with clunky POS integrations, forgotten cards, or customer frustration. Enrolling a new customer takes too long.

With Jellin:

"Your number?" — type it in or scan a QR code. The system shows customer status, Jells count, and next reward. Enrollment takes seconds.

Everyday impact: Work becomes smoother. Staff create positive interactions rather than being held back by cumbersome systems.

Customer Personas — Detailed Profiles

1. The Daily Regular — "Sarah"

Archetype	Habitual, routine-driven consumer
Scenario	Coffee Shop
Motivation	Earn rewards passively through repeat visits; feel valued as a regular
Engagement	Low-friction, phone-number-only. No app download. Accumulative rewards.
Key quote	<i>"Cool, thanks!"</i>

2. The Fitness Enthusiast

Archetype	Active, multi-location member
Scenario	Gym Network
Motivation	Unlock tangible perks by staying active
Engagement	QR-based check-in. Gamified progression.
Key quote	<i>"Nice! What can I get with those?"</i>

3. The Hotel Traveler

Archetype	Transient visitor exploring a new area
Scenario	Hotel / Hospitality Ecosystem
Motivation	Get immediate value from the hotel stay; discover local partners effortlessly
Engagement	SMS/QR-only, no app download. Instant rewards + cross-business discovery.
Key quote	<i>"Wow, that's great! Can I use it at other places too?"</i>

4. The Sports Fan

Archetype	Passionate team supporter and merchandise buyer
Scenario	Sports Team / Merchandise
Motivation	Instant, tangible rewards tied to team loyalty
Engagement	Email-based delivery with QR verification. Online + physical.
Key quote	<i>"Yes, here it is"</i>

5. The Mall Explorer

Archetype	Casual shopper open to discovery
Scenario	Shopping Mall
Motivation	Tangible mall-wide rewards that make exploring feel rewarding
Engagement	Phone-number-only sign-up. Cross-store earning.
Key quote	<i>"Can I add to my mall rewards here too?"</i>

Business Personas — Detailed Profiles

6. The Independent Shop Owner

Archetype	Small business owner managing a single location
Needs	Easy campaign setup, phone/email-only onboarding, real-time analytics
Jellin value	Dual coupon system, no-friction sign-up, campaign analytics, privacy by design
Key concern	<i>"Will this be easy to set up and run with my small team?"</i>

7. The Multi-Location Operator

Archetype	Chain or franchise manager overseeing multiple locations
Needs	Unified dashboard, flexible permissions, cross-location loyalty, employee tracking
Jellin value	Network-wide loyalty, operational insights by salepoint, employee monitoring
Key concern	<i>"Can I manage all my locations from one place and still track each one?"</i>

8. The Ecosystem Builder

Archetype	Partnership coordinator or property manager
Needs	White-label marketplace, partner integrations, shared Jells, privacy protection
Jellin value	Issue Jells at Company A, redeem at Company B. Branded ecosystems. Shared traffic.
Key concern	<i>"Can my partners participate without complex technical setup?"</i>

9. The Marketing Professional / Agency

Archetype	Marketing strategist managing campaigns for clients
Needs	Multi-channel delivery, campaign analytics, client-facing performance data
Jellin value	One platform for loyalty + acquisition + engagement. Real-time tracking of redemptions.
Key concern	<i>"Can I prove campaign success to my clients with hard data?"</i>

10. The Sports / Entertainment Organization

Archetype	Sports team, venue, or entertainment brand
Needs	Instant reward triggers on purchase, QR-based verification, online + physical
Jellin value	Automatic reward fulfillment, email/QR delivery, no app requirement
Key concern	<i>"Can we reward merchandise buyers with event access seamlessly?"</i>

Frontline Staff Persona

11. The Cashier / Receptionist

Archetype	Point-of-sale employee executing loyalty transactions
Behavior	Asks "Your number?", enters or scans, communicates reward status. Can onboard new customers on the spot.
Needs	Fast lookup, clear reward status display, seconds-fast onboarding
Jellin value	Simple phone-number or QR-scan workflow. Instant feedback. No complex training.

Persona–Scenario Matrix

Persona	Coffee Shop	Gym Network	Hotel	Sports Team	Shopping Mall
The Daily Regular	•				
The Fitness Enthusiast		•			
The Hotel Traveler			•		
The Sports Fan				•	
The Mall Explorer					•
Independent Shop Owner	•				
Multi-Location Operator		•			
Ecosystem Builder			•		•
Marketing Professional	•	•	•	•	•
Sports / Entertainment Org				•	
Cashier / Receptionist	•	•	•	•	•

Key Themes Across All Personas

- **Minimal friction** — Phone number or email is the only data required
- **Multi-channel flexibility** — App, QR, SMS, and email delivery
- **Cross-business value** — Jells earned at one business can be redeemed at another
- **Scalability** — Works for a single cafe and a multi-brand mall ecosystem
- **Privacy first** — Only phone numbers or emails. GDPR compliant. Trust by design.
- **Instant gratification** — Rewards are immediate and tangible

PART III

Technical Modules

Core technical modules of the Jellin platform — how loyalty programs, coupons, check-ins, user roles, groups, cross-business collaboration, delivery, and analytics work together.

1. Loyalty Programs

A business owns a single Jellin account and can create **multiple loyalty programs** under it. Each loyalty program defines the rules for how customers earn and redeem rewards. Loyalty programs are assigned to **groups**, which determine which users and points of sale can operate under them.

2. Coupons

Each loyalty program supports **three coupon types**:

2.1 Counting Coupon

Earned after **X consecutive check-ins**. The business defines the threshold (e.g., "free coffee after 5 check-ins").

How it works: Customer checks in → Employee assigns Jells → At threshold, coupon is automatically generated and awarded.

2.2 Instant Coupon

Assigned **immediately** by the employee — no accumulation required.

Use cases: Welcome offers (hotel check-in), cross-business partner promotions, one-time incentives, event-based rewards.

2.3 Sweepstake Coupon

Awarded **randomly** to enrolled customers within a configured date range — no employee action or check-in required.

Configuration: Loyalty program (base), date range (window), coupon quantity (how many distributed randomly).

Use cases: Slow-period engagement, surprise-and-delight, re-engaging dormant customers, lottery-style promotions.

3. Check-In Methods

App Check-In (QR Scan)

1. Customer opens Jellin app, presents profile QR code
2. Employee scans with Jellin Business App
3. Check-in recorded instantly

No-App Check-In (Phone / Email)

1. Customer tells employee their mobile number or email
2. Employee enters it in the Jellin Business App
3. Check-in recorded

After check-in (both methods), the employee can **assign Jells** toward a counting coupon or **assign an instant coupon** directly.

4. User Roles & Permissions

Role	Capabilities	Analytics
Owner	Full control of account. Create/manage programs, groups, users. Invite external users via email.	Full access
Manager	Full approval credentials. Create/manage programs, groups, users. Can cancel appointed coupons.	Full access
Employee	Check-ins and reward assignment (scoped: Jells only, instant coupons only, or both). No management access.	None

5. Groups

Groups are the organizational unit connecting **loyalty programs**, **users**, and **points of sale**. A business can create as many groups as needed.

Group Type	Purpose	Example
Own network	Organize internal points of sale	A gym chain creates a group per city
Satellite / partner	Enable cross-business collaboration	A hotel creates a group for partner businesses
Campaign-specific	Isolate specific promotions	A mall creates a seasonal holiday program group

6. Cross-Business Collaboration

Jellin enables cross-business rewards through groups, loyalty programs, and external user invitations:

1. **Business A** (e.g., a hotel) creates a partner group
2. Business A activates loyalty programs within that group
3. Business A **invites users from Business B** (e.g., a café) via email
4. The invited user joins as an **employee/operator** within that group
5. The invited user can assign **instant coupons** to customers under Business A's program

Typical setup: A business maintains **Internal groups** (own shops — full Jells + instant coupons) and **Partner groups** (satellite businesses — instant coupons only). A hotel guest earns a coupon at check-in and redeems it at a partner café — without the café needing its own Jellin account.

7. Coupon Delivery

Email

QR code in email — no app needed

App

In-app coupon with QR

SMS

QR link via text message

Cross-business redemption via email: Customer earns coupon at Business A → coupon emailed with QR → customer visits Business B → shows QR → employee scans → coupon redeemed. Works without either party needing anything beyond an email and a QR scanner.

8. Analytics

Full analytics accessible to Owners and Managers, segmented across multiple dimensions:

Dimension	Examples
By loyalty program	Performance of each program individually
By group	Internal groups vs. partner groups
By point of sale	Traffic and redemption per location
By user / employee	Individual operator performance
By coupon type	Counting vs. instant coupon activity
By customer	Visit frequency, accumulation, redemption history
By time period	Daily, weekly, monthly trends
Cross-business	Partner network contribution and cross-redemption

Module Relationship Overview

Jellin Business Account (1 per business)

└ Loyalty Programs (multiple)

└ Counting Coupons (earned after X Jells)

└ Instant Coupons (assigned immediately)

└ Sweepstake Coupons (awarded randomly within a date range)

└ Groups (multiple)

└ Assigned Loyalty Programs

└ Assigned Users (internal employees)

└ Invited Users (external operators from partner businesses)

└ Users

└ Owner — full control, analytics, invitations

└ Manager — programs, groups, users, cancellations, analytics

└ Employee — check-ins and coupon assignment (scoped permissions)

└ Check-In

└ App (QR scan from customer's Jellin app)

└ No-App (phone number or email lookup)

└ Delivery

└ Email (QR code in email — no app needed)

└ App (in-app coupon with QR)

└ SMS (QR link via text)

└ Analytics

└ Full reporting by program, group, salepoint, user, coupon type, customer, time

PART IV

Financials

Cost structure, pricing model, Greek market sizing, reach estimates, 3-year financial projections, and angel investment scenarios.

Operating Costs & Pricing

Team

Role	Count	Scope
Application Engineer	1	Development and maintenance of the Jellin platform
App Engineer / Product & BD	1	Platform engineering, product strategy, business development, go-to-market

Both founding team members are engineers. Development investment (app, website, marketing materials) funded by stakeholder contributions as founding capital.

Pricing Model

Plan	Price	Modules	Group Limit	Sales Model
Trial	Free (1 month)	All	Standard	Self-service
Standard	\$20 / month	All	Up to 5	Self-service
Enterprise	\$150 – \$2,500 / month	All	Unlimited	Contact sales

Add-Ons

CRM / ERP Connectors: \$70 per connector / year (annual billing). Available on Standard and Enterprise. Syncs Jellin data with POS, CRM, ERP, and automation tools.

Cost vs. Revenue Overview

COSTS	REVENUE
Azure hosting (infrastructure)	Standard plans (\$20/mo)
1× Application Engineer	Enterprise plans (\$150–\$2,500/mo)
1× App Engineer / Product & BD	CRM/ERP connectors (\$70/yr each)
Development investment:	
└ App development	— Funded by stakeholder contributions
└ Website	— (non-recurring, founding capital)
└ Marketing materials	

Greek Market Size by Vertical

Greece (population ~10.4 million, GDP ~€230 billion in 2025) is Jellin's initial target market.

Vertical	Establishments	Annual Revenue	Jellin-Relevant Segment
Cafés & Coffee Shops	~38,000 – 42,000	€4 – 5 billion	~35,000 independent/small chain
Apparel & Fashion	~18,000 – 22,000	€5 – 6 billion	~15,000 independent/Greek chain
Gyms & Fitness	~2,500 – 3,000	€500 – 700 million	~2,000 multi-location & independent
Hotels & Hospitality	~9,700 – 10,500	€12 – 14 billion	~4,300 (3-to-5-star)
Shopping Malls	~35 – 45 centers	incl. in retail	~20 – 30 major centers
Total	~68,000 – 77,000	€21.5 – 25.7 billion	~56,000 + ~25 centers

Reach Estimates — 3-Year Horizon (Greece)

	Year 1	Year 2	Year 3
Total subscribers (low)	~300	~1,300	~3,250
Total subscribers (high)	~700	~2,700	~6,000
Estimated MRR (low)	€8,100	€32,900	€80,000
Estimated MRR (high)	€35,100	€115,000	€247,500
Estimated ARR (low)	€97,200	€394,800	€960,000
Estimated ARR (high)	€421,200	€1,380,000	€2,970,000

Subscriber counts represent paying businesses, not end consumers. Greece-only, no churn adjustment.

3-Year Financial Projections

Low Scenario — Organic Growth

	Year 1	Year 2	Year 3
Subscription Revenue	€48,600	€246,000	€677,400
Connector Revenue	€350	€1,400	€3,500
Total Revenue	€48,950	€247,400	€680,900
Personnel (2→2→3)	€98,000	€102,000	€156,000
Azure Infrastructure	€7,800	€25,200	€64,200
Social Media Marketing	€12,000	€30,000	€48,000
LLM Support	€2,100	€6,600	€16,050
SaaS Tools & Services	€3,600	€4,200	€4,800
Total Operating Costs	€123,500	€168,000	€289,050
EBITDA	-€74,550	€79,400	€391,850
Net Margin	-152%	32%	58%
Cumulative Cash	-€74,550	+€4,850	+€396,700

Reaches profitability in **Year 2** and recovers cumulative losses by early Year 2.

High Scenario — Sales-Driven Growth

	Year 1	Year 2	Year 3
Subscription Revenue	€210,600	€900,600	€2,175,000
Connector Revenue	€1,400	€4,200	€10,500
Total Revenue	€212,000	€904,800	€2,185,500
Personnel (2→3→4)	€98,000	€153,000	€212,000
Azure Infrastructure	€18,600	€73,200	€180,600
Social Media Marketing	€36,000	€84,000	€144,000
LLM Support	€6,000	€22,800	€55,800
SaaS Tools & Services	€3,600	€4,800	€6,000
Total Operating Costs	€162,200	€337,800	€598,400
EBITDA	€49,800	€567,000	€1,587,100
Net Margin	23%	63%	73%
Cumulative Cash	+€49,800	+€616,800	+€2,203,900

Profitable from **Year 1**. Generates over **€2.2M cumulative cash** by end of Year 3.

Unit Economics

Metric	Y1 Low	Y1 High	Y2 Low	Y2 High	Y3 Low	Y3 High
Subscribers (EoY)	300	700	1,300	2,700	3,250	6,000
Monthly ARPU	€27	€50	€25	€43	€25	€41
CAC	€40	€51	€30	€42	€25	€44
LTV (24 mo)	€648	€1,200	€600	€1,032	€600	€984
LTV / CAC	16×	24×	20×	25×	24×	22×
Payback period	1.5 mo	1.0 mo	1.2 mo	1.0 mo	1.0 mo	1.1 mo
Gross margin	80%	88%	87%	89%	88%	89%

LTV/CAC well above 3× (SaaS benchmark). Payback under 2 months. Gross margins of 80–89% consistent with best-in-class SaaS.

Key Financial Indicators — Summary Dashboard

	LOW SCENARIO			HIGH SCENARIO		
	Year 1	Year 2	Year 3	Year 1	Year 2	Year 3
Revenue	€48.9K	€247.4K	€680.9K	€212.0K	€904.8K	€2,185K
Total Costs	€123.5K	€168.0K	€289.1K	€162.2K	€337.8K	€598.4K
EBITDA	-€74.6K	€79.4K	€391.9K	€49.8K	€567.0K	€1,587K
Net Margin	-152%	32%	58%	23%	63%	73%
Cumulative Cash	-€74.6K	€4.9K	€396.7K	€49.8K	€616.8K	€2,204K
End-of-Year ARR	€97.2K	€394.8K	€960.0K	€421.2K	€1,380K	€2,970K
Subscribers (EoY)	300	1,300	3,250	700	2,700	6,000

Addendum A — Angel Investment Scenarios

Prepared for prospective investors

Deal Structure

	Low + Investment	High + Investment
Investment amount	€50,000	€100,000
Equity acquired	25%	25%
Pre-money valuation	€150,000	€300,000
Post-money valuation	€200,000	€400,000
Founder(s) retain	75%	75%

How the Investment Changes the Model

1. **Founders cover their own salary** in Year 1, reducing personnel costs to zero (Low) or to a single junior hire (High). This represents significant founder commitment that de-risks the company's cash position.
2. **Investment capital is deployed into marketing and runway**, accelerating subscriber acquisition. Additional hires are made when financials justify it.

Capital Deployment Plan

Use of Funds	Low (€50K)	High (€100K)
Increased Year 1 marketing	+€8,000	+€19,000
Content / freelance support (Y1)	+€6,000	—
Junior engineer (Y1)	—	€38,000
Cash runway buffer	€36,000	€43,000
Total	€50,000	€100,000

Growth Acceleration

	Baseline Low	Invested Low	Baseline High	Invested High
Y1 end subscribers	300	400 (+33%)	700	950 (+36%)
Y2 end subscribers	1,300	1,700 (+31%)	2,700	3,500 (+30%)
Y3 end subscribers	3,250	4,000 (+23%)	6,000	7,500 (+25%)

Revised P&L — Low Scenario + €50K

	Year 1	Year 2	Year 3
Total Revenue	€65,290	€342,300	€879,950
Total Costs	€41,000	€231,500	€365,300
EBITDA	€24,290	€110,800	€514,650
Net Margin	37%	32%	58%
End-of-year Cash	+€74,290	+€185,090	+€699,740

Revised P&L — High Scenario + €100K

	Year 1	Year 2	Year 3
Total Revenue	€287,100	€1,193,600	€2,762,000
Total Costs	€127,200	€412,000	€703,600
EBITDA	€159,900	€781,600	€2,058,400
Net Margin	56%	65%	75%
End-of-year Cash	+€259,900	+€1,041,500	+€3,099,900

Investor Return Analysis

Enterprise value estimated at revenue multiples applied to Year 3 ARR (SaaS companies with 80%+ gross margins, LTV/CAC > 10×, and 25%+ growth).

Low — €50K for 25%				High — €100K for 25%			
	5× ARR	7× ARR	10× ARR		5× ARR	7× ARR	10× ARR
Enterprise value	€6M	€8.4M	€12M	Enterprise value	€18.5M	€25.8M	€36.9M
Investor's 25%	€1.5M	€2.1M	€3M	Investor's 25%	€4.6M	€6.5M	€9.2M
Return	30×	42×	60×	Return	46×	65×	92×

Recommendation for Investors

Both scenarios present an attractive angel-stage opportunity with asymmetric upside:

€50K / Low scenario

Risk-averse angels seeking diversification. Founders cover their own salary in Year 1. Capital fuels marketing and builds cash runway. **Profitable from Year 1** with zero cash deficit. Return potential: **30–60x**.

€100K / High scenario

Conviction-driven angels seeking maximum absolute return. Investment funds a junior engineer in Year 1. Larger capital base enables aggressive marketing. **€3.1M cumulative cash** by Year 3. Return potential: **46–92x**. Series A readiness.

Key risk mitigants:

- Low pre-money valuation (€150K–€300K) — entry far below Year 1 revenue
- Founders cover their own salary in Year 1 — strong alignment
- SaaS gross margins of 88–89%
- LTV/CAC of 16–24×
- Lean 2-person founding team — costs adjust quickly
- Greece-first strategy — low-cost market validation before international expansion
